DETAILED ACTION

1. This is in response to the Applicant's amendments and arguments filed on September 10, 2004 in which claims 1, 3-5, and 8-12 have been amended, claims 13-19 have been added, and claims 7 has been canceled. Claims 1-6 and 8-19 are currently pending.

Allowable Subject Matter

2. After a further search and thorough examination of the present application and in view of the applicant's arguments and amendments, claims 1-6, 13-16, 8-12, and 17-19, renumbered respectively as 1-18, are found to be in condition of allowance.

3. The following is an examiner's statement of reasons for allowance: the cited prior art teaches a system that can communicate by means of the data message as well as the voice calling as the emergency call. In the prior art, the emergency voice call has to be terminated before restarting the emergency call ordering the data message communication.

On the other hand, the Applicant teaches, inter alia, determining whether messaging is desired during the voice communication, and communicating with the remote station using a messaging system without terminating the emergency call when the messaging is desired. These limitations, in conjunction with all limitations of the independent claims, have not been disclosed, taught, or made obvious over the prior art of record.

Art Unit: 2681

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
